# US 100 Installation Guide

Hand-free Stand

cino

Overview

Thank you for purchasing Cino US100 Hand-free Stand. The US100 is specifically designed for hands-free applications, delivering great flexibility to maximize users' comfort and productivity. This document provides an easy reference for assembling and installing the US100.

Package Content :

1 Bracket
2 Scanner Holder
3 Angle Adjustment Knob
4 Base

Assemble the Stand

Step 1

Base Supporter

1 Turn the base upside-down and open the base supporters.

2 Turn the base to the front side and place the base on your desired location.

If you would like to fix the stand by screw, please follow below procedures.

Screw Hole

1 Insert a M4 (approx. 8~10mm long) flat head self-tapping screw into the screw hole of the base.

2 Tighten the screw to secure the base to the flat surface.

✍ **Please note that the M4 screw is not provided in this package.**

Step 2

1 Fit the bracket into the base to lock the bracket to the base.

2 Place the scanner holder on the bracket groove properly.

Step 3

1 Insert the angle adjustment knob. Turn the knob clockwise to secure the scanner holder to the bracket.

2 The stand is now ready to be used with the scanner. You can loose the knob to adjust the angle.

Dismount the Stand

1 Release the knob to remove the scanner holder.

2 Prepare a long screwdriver and insert it into the hole on the top of the bracket.

3 Loose the screw from the base and remove the base from the mounted surface.
